

# Steps to Install MySQL 8.0 on windows

1. Go to mysql.com website → Select Downloads option
2. Select MySQL community Edition
3. Download MySQL community server 8.0

## **While installing**

-> choose setup Type: **Devloper (default) (Next)**

-> Click **Execute** Button

-> Install other essential software required → Click **Next**

-> Product Configuration → Click **Next**

-> Group Replication : Select Standalone MySQL server → Click **Next**

-> Type and Networking → Click **Next**

-> Authentication Method

Select strong password Encryption for Authentication (select)

Click **Next**

-> Account And Roles

MySQL root password : **Enter password**

Repeat Password: **reenter it**

Click **Next**

-> Windows Service

check the box: start the MySQL server at system start

Run Windows service as:          standard system account

Click **Next** → **Execute it**

A photograph of a modern conference room with large windows and a long table, overlaid with a dark, textured brushstroke effect. The room features a long wooden conference table with several black office chairs. Large windows on the left and right sides offer a view of a cityscape. The ceiling has a grid of recessed lights. The entire image is framed by a dark, textured border that looks like a paintbrush stroke.

## Type and Networking

### Server Configuration Type

Choose the correct server configuration type for this MySQL Server installation. This setting will define how much system resources are assigned to the MySQL Server instance.

Config Type: Development Computer

### Connectivity

Use the following controls to select how you would like to connect to this server.

☒ TCP/IP

Port: 3306

X Protocol Port: 33060

☒ Open Windows Firewall ports for network access

☐ Named Pipe

Pipe Name: MYSQL

☐ Shared Memory

Memory Name: MYSQL

### Advanced Configuration

Select the check box below to get additional configuration pages where you can set advanced and logging options for this server instance.
